### Tip of the Day

Counting sounds easy, but is one of the hardest skills to master. We've been counting so long that we think it's something we don't need improvement on, but most people count poorly. Instead of counting a suit "1-2-3-4" up to 13, count in splits. If you have eight trump between you and dummy the remaining trump are either 3-2, 4-1 or 5-0. When you draw trump and both follow to the first round you know that they were originally 4-1 or 3-2 play another round and you will know what the split was (3-2 if they both follow or 4-1 if not). It's much easier to count out the whole hand when you think "trump were 4-1 with 4 on my left and diamonds were 6-2 with 6 on my left" than to go and count each card.
