## HAVE A QUESTION? WANT TO JOIN OUR GROUP SPECIALTY RESERVATION?

### Michael Berkowitz

*Is your Alice Travel representative on this cruise. He will be on board and will be happy to help with any of your cruise-related questions. He will be available each morning prior to Robert's lecture as well as before each session of bridge.*

### Share your success!

*If you become a life master, please let us know! We'll celebrate with a photo and a special prize at the awards ceremony. If you have a friend who is too shy to tell us, you can inform us on their behalf. Please see Michael if you know of someone who becomes a life master on this cruise.*

### Pace of play

You don't have to be the speediest player if you use these steps to keep the game moving

- Always put down dummy before entering scores in your private scorer or the bridgemate
- Score in the bridgemate before your private score to allow your opponents to move for the next round
- If the round is called and you are still playing a board, make sure to pass your completed boards to the next table
- Save discussions for after the game or between rounds, always move for the next table if the round has been called

## ROBERT'S LECTURES ARE At 9:15 IN THE HOLLYWOOD THEATER

## ALL BRIDGE GAMES ARE IN THE BRIDGE LOUNGE ON DECK 7

**DON'T FORGET** to wear your name badge to all bridge events.

## Todd's Tips

Words of wisdom from Robert's lectures

We know that in order to preempt you have to know about things like suit quality and vulnerability, but have we been thinking about them wrong?

For suit quality, we often think of AKxxxx as a good suit, but it has the same number of losers opposite a singleton as QJ109xx. The J/10/9/8 of suits can make the difference between having a good suit and a bad suit so make sure you look past the honors.

For vulnerability, don't just consider whether you are vulnerable or not. Whether the opponents are vulnerable should also influence your decision. The most aggressive colors (vulnerability) is when you are not vulnerable (white) and the opponents are vulnerable (red). Since your opponents' game is worth 600 or 620, you could get doubled and go down 3 and still do better than letting them make a game. Next most aggressive is white vs white.

When vulnerable, you can still be reasonably aggressive at red vs red, but should be at your most conservative when you are vulnerable facing non-vulnerable opponents.
